

New Start

Lawn Seed Mixture

Whether it's a new lawn or a renovation, "**New Start**" represents the very best we have to offer!

It is ideal for homeowners who want to "**do it right the first time**", or who simply wish to upgrade to something better than they had originally. "New Start" is highly recommended where higher-than-average fertilization is expected.

The latest NTEP (National Turfgrass Evaluation Program) ratings demonstrate that there are no middle-of-the-road or "filler" varieties in this mix.

- ♣ These varieties have an attractive rich, dark green color.
- ♣ Improved disease resistance.
- ♣ High density at clipping heights down to _ inch.
- ♣ Very high tiller density
- ♣ Top rated for overall performance

Recommended new seeding rate – on bare, cultivated soil:

4-5 pounds per 1,000 square feet
