

Superior Drought Tolerance with Low Maintenance

Heathland EWS Chewings Fescue is the latest generation of Fineleaf Fescues, achieving new performance heights in quality, low maintenance requirements and drought-tolerance.

For landscaping and golf course applications in which fertilization and irrigation are limited, **Heathland EWS** (enhanced weed suppression) is proving to be a superior choice, particularly in light of its TWCA qualification, as well as disease resistance.

Call your **TMI** representative about this hardy Fineleaf Fescue and how it earns a place in your mix.

Heathland is a TWCA qualified turfgrass, well suited for seed mixes intended for landscaping, and golf courses.

HEATHLAND CHEWINGS FESCUE

Heathland EWS has the characteristics of Chewings Fescue, with fine leaf texture, high shade and drought tolerance as well as allelopathic qualities that resist weed overgrowth. It also requires less frequent mowing than ryegrass, tall fescue or Kentucky bluegrass, and performs well in low fertility areas such as golf course roughs.

Drought tolerance is a key benefit of **Heathland EWS**, qualifying under TWCA trials, and recognized as a **TMI** "AquaWise" turfgrass.

The qualification of **Heathland EWS** by the Turfgrass Water Conservation Alliance (TWCA) represents a big benefit of this turfgrass. The protocols for TWCA certification are highly demanding, requiring that water-starved grass maintain green covering through a series of drought simulations.

CTBT trials also showed **Heathland EWS** to exhibit excellent genetic color and turf quality, ranking in the top 3 of Chewings Fescue entries.

Additionally, **Heathland EWS** demonstrated strong Summer Patch resistance!

KEY BENEFITS:

- Drought Tolerance
- Low Maintenance Requirements
- Low Input Requirements
- Turfgrass Quality
- Disease-Resistance
- Enhanced Weed Suppression

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
