

PARAGON

Superior Resistance To Gray Leaf Spot

Paragon GLR is the breakthrough variety for which turf managers in the Northeast, Mid-Atlantic and Midwest need to combat Gray Leaf Spot!

TMI began working with several renowned breeding programs to produce a resistant variety that could withstand the ravages of a gray leaf spot outbreak following the initial outbreaks of the turf disease in the 1990's.

The result is a spectacular variety with deep green color and fine texture that has been developed using only traditional breeding methods.

Paragon GLR is a Blue Tag certified grass seed ideal for sports field and golf applications, including new seeding and overseeding.

Ryegrass with Gray Spot Leaf

Paragon GLR

When Gray Leaf Spot first hit golf courses in the 1990's the industry was largely ill-prepared to deal with the aggressive fungus, or its rapid spread across transition zone states.

Fungicides have produced some results, however with **Paragon GLR**, superintendents and sports field managers have a much safer and reliable solution – a grass seed with demonstrated resistance, which also possesses many of the best characteristics of Perennial Ryegrass.

In NTEP Trials, Paragon GLR was rated:

- **#1 in Turfgrass Quality Ratings***
- **#1 in Typhula Blight Ratings****

Paragon GLR is in constant demand, so contact your local distributor early to ensure a delivery in time for seeding or overseeding!

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
