Recent research has shown that well-maintained turf is an effective environmental buffer that prevents pollutants from entering our natural water bodies. To help protect these natural resources, avoid applying product to sidewalks, driveways, roadways, and other impervious surfaces. Sweep any misplaced granules back onto the area you are treating immediately after application, since storm drains often empty directly to nearby waterways.

**LANDSCAPE AND ORNAMENTAL APPLICATIONS**

Because of the variety of plants, different growing media, and variable climates, recommended application rates are not provided. Use rate for particular species of plant. This product can be mixed with growing media.

**NURSERY STOCK (FIELD GROWN) AND GOLF COURSE ORNAMENTALS**

Broadcast apply 500 pounds of product per acre in the spring and fall. Use 350 pounds per acre three times per year for very sandy soil, applying in spring, summer and late fall. Uniformly apply fertilizer to areas surrounding plants. Lightly cover fertilizer with soil or mulch.

**ON SELECTED TURF AREAS**

Broadcast 160 to 228 pounds of product per acre to maintain desirable color and density. Reduce application rate in summer months and water in where possible.

**STORAGE AND USE**

Store in a clean, dry place. Reseal opened bag by folding top down and securing. Use only in clean, dry spreaders. Do not leave unused product in spreaders.

**IMPORTANT: READ BEFORE USE:**

Read the entire Directions for Use and the Warranty Disclaimer and Limitation of Liability before using this product. If terms are not acceptable, return the unopened product container at once.
