

Wear-Tolerant Shamrock Type Kentucky Bluegrass

Bonaire exhibits above average turf quality, good establishment and moderate spring vigor.

Since **Bonaire** is a "Shamrock" Type, disease tolerances are moderate to good for leaf spot disease and stripe smut. **Bonaire** is an excellent replacement for the "BVMG" types, which are highly susceptible to rust. It has a medium dark green color and has excellent Rhizomatous development for sod production.

Bonaire is readily available, so call your **TMI** representative about this superior turfgrass.

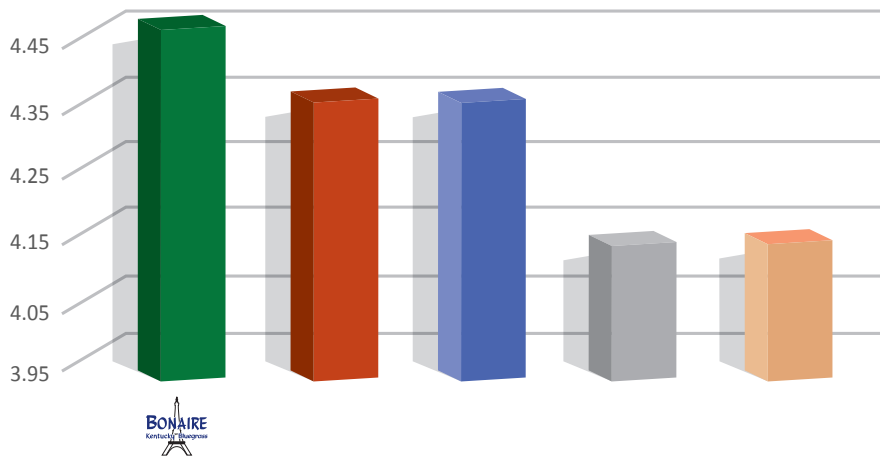

Bonaire is ideal for golf courses, parks and recreation, and landscaping applications.

As a Shamrock Type, **Bonaire** is a real workhorse in any blend or mixture in which strong rhizomes, sod strength and wear tolerance are needed, all while providing excellent value.

Turf Quality - University Turf Trials

According to university trials, **Bonaire** provides a medium green winter color and good leaf spot resistance to any turf where bluegrass is adapted.

KEY BENEFITS:

- Turfgrass Quality
- Traffic Wear Tolerance
- High Value
- Disease Resistance

Industry Leaders

TMI develops, produces and markets turf grass seeds for the United States, North America and more than 20 other countries around the world.

Golf courses, sod growers for sod production and landscapers the world over have found TMI's cool season grasses, warm season grasses, golf grass, and specialty grasses to be state of the art when it comes to color, texture, uniformity, disease resistance and overall performance.

Our extensive network of carefully chosen seed growers produces seeds of the highest quality in the world, with high germination rates and purities that exceed official standards. Our certification, testing and quality controls continue to raise the benchmark for the entire Industry.
